

LUMP BREAKER

Crush lumps with our solution!

A lump breaker is the optimal solution for crushing soft lumps, for example salt or talc which has occurred during the handling of the material, which are soft enough to be crushed. The rapid rotation of the special knives grind down lumps and provide a high capacity. Two-axis.

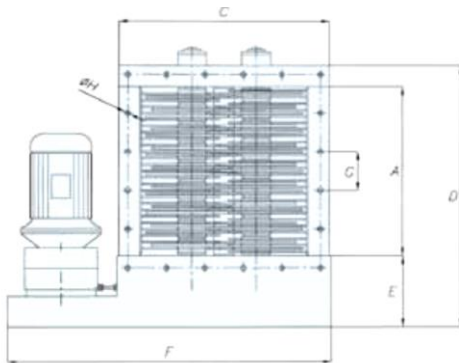

The drive unit consists of

- Fixed motor gear or adjustable rpm
- Chain transmission
- Gear transmission

Material

- Carbon steel
- AISI 304/316 stainless steel
